## RISK FACTORS

The following is a summary of the principal risks of investing in Carlyle Alpinvest Private Markets Secondaries, a Sub-Fund of Carlyle Alpinvest Private Markets SICAV-UCI Part II (Fund) and is qualified in its entirety by the more detailed risk factors sections in the Prospectus and the risks set forth in the key information document of the relevant share class. Capitalized terms not otherwise defined herein are as defined in the Prospectus.

Prospective investors should be aware that an investment in the Fund involves a high degree of risk, and it is suitable only for those investors who have the financial sophistication and expertise to evaluate the merits and risks of an investment in the Fund and for which the Fund does not represent a complete investment program. An investment in the Fund involves subscribing to shares of the Fund and not of a given underlying asset. An investment in the Fund should only be considered by persons who can afford a loss of their entire investment. Prospective investors are urged to consult with their own financial, tax, and legal advisors about the implications of investing in the Fund.

**PRIIPS Risk Indicator:** Under the packaged retail and insurance-based investment products (PRIIPs) Regulation, we have classified this product as a 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the capacity of the Fund to pay you. Be aware of currency risk. You may receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. The summary risk indicator does not include all risks inherent in the Shares and therefore it does not represent the total risk to the investor. The Fund may invest in assets which have valuation and performance uncertainties and liquidity risk. The Prospectus gives more detail on the risks investors should consider. This product does not include any protection from future market performance, so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

**Competition for Investments; Availability of Investments.** Alpinvest cannot provide any assurance that it will be able to choose, make or realize any particular investment, asset, or portfolio on behalf of the Fund. There can be no assurance that investments made by the Fund will be able to generate returns or that the returns will be commensurate with the risks of investing in the type of transactions described herein.

The activity of identifying, completing and realizing upon attractive investments is highly competitive and involves a high degree of uncertainty. The Fund must compete for investments with other private equity investors having similar investment objectives. It is possible that competition for appropriate investment opportunities may increase, thus reducing the number of investment opportunities available to the Fund and adversely affecting the terms upon which investments can be made. The portfolio companies in which the Fund may invest (directly or indirectly) are speculative investments and will be subject to significant business and financial risks.

**Risk of Loss; Illiquidity of the Shares.** The Fund is intended for long-term investment by investors that can accept the risks associated with making highly speculative, primarily illiquid investments in privately negotiated transactions. The possibility of partial or total loss of investment of the Fund exists, and prospective investors should not invest unless they can readily bear the consequences of such loss. Illiquidity will result from the absence of an established market for Fund investments, as well as from legal or contractual restrictions on the resale of Fund investments by the Fund or on the resale of portfolio companies by underlying funds. Furthermore, the transferability of Shares is subject to certain restrictions as described in the Prospectus.

Potential investors should note that although redemptions are expected to be offered on a quarterly basis, the Sub-Fund offers limited redemption rights. Redemptions are subject to gates in case of redemption requests exceeding certain thresholds, and early redemption fees. The Fund should therefore be considered to offer limited liquidity.

**Conflicts; Other Funds.** Alpinvest and/or its affiliates will be permitted to market, organize, sponsor, act as general partner or as the primary source for transactions for other pooled investment vehicles and other accounts, which may be offered on a public or private placement basis, and to engage in other investment and business activities. Some of these funds and accounts will have investment strategies that overlap with the investment strategies of the Fund. Such activities may raise conflicts of interest for which the resolution may not be currently determinable.

**Leverage; Borrowings.** To the extent the Fund borrows money or otherwise leverages its investments, the favorable and unfavorable effects of price movements in the Fund's investments will be magnified. A Fund investment with substantial leverage may be at risk of increases in interest rates and therefore increases in interest expenses. In the event any Fund investment cannot generate adequate cash flow to meet debt service, the Fund may suffer a partial or total loss of capital invested in the Fund investment. The use of leverage will also magnify the volatility of changes in the value of the Fund's investments. While the use of leverage may increase a borrower's returns, it will also increase its exposure to risk.

**Investors in a Fund will bear multiple layers of fees and expenses.** In general, the Fund's investors will bear the fees, expenses and performance fees of the Fund and will indirectly bear any fees, expenses and performance fees or carried interest (if any) of the Fund's investments. Such amounts are expected to be material. This will result in greater expense to a Fund's investors than if such fees, expenses and carried interest were not charged by both a Fund and its underlying investments.

**No Operating or Investment History.** The Fund has only recently commenced operations and therefore has limited operating history upon which prospective investors may evaluate its performance.

**Complex Tax and Regulatory Risks.** Legal, tax and regulatory changes (including changing enforcement priorities, changing interpretations of legal and regulatory precedents or varying applications of laws and regulations to particular facts and circumstances) could occur during the term of the Fund that may adversely affect any of such Fund or its investors.

**Currency Risks.** The Fund's base currency may be one that is different from an investor's home currency. Subscriptions to, and distributions from, the Fund will generally be required to be made in the Fund's base currency. Accordingly, changes in currency exchange rates, costs of conversion and exchange control regulations can adversely affect an investor's investment in the Fund, including the investor's cost of investing in the Fund.

**Reliance on Alpinvest.** Potential investors must rely upon the ability of Alpinvest to identify and make investments consistent with the Fund's investment objective and policies. The Fund may be unable to find a sufficient number of attractive opportunities to invest its offering proceeds or meet its investment objective. Further, there can be no assurance that what is perceived by Alpinvest as an attractive investment opportunity will not, in fact, result in substantial losses due to one or more of a wide variety of factors.

**Projections.** The Fund will from time to time rely upon projections, forecasts or estimates developed by the Fund or an underlying fund or a portfolio company in which the Fund is invested or is considering making an investment, concerning such underlying fund's or portfolio company's future performance and cash flow. Projections, forecasts and estimates are forward-looking statements and are based upon certain assumptions. Actual events are difficult to predict and beyond the Fund's control. Actual events may differ from those assumed. Some important factors that could cause actual results to differ materially from those in any forward-looking statements include changes in interest rates and domestic and foreign business, market, financial or legal conditions, among others. Accordingly, there can be no assurance that estimated returns or projections can be realized or that actual returns or results for the Fund or its Investments will not be materially lower than those estimated or targeted therein.

**Financial Market Fluctuations and Deteriorating Current Market Conditions.** The success of the Fund's activities will be affected by general economic and market conditions, such as interest rates, availability of credit, credit defaults, inflation rates, including the advent of significant inflation, recession, economic uncertainty, changes in laws (including laws relating to taxation of the Fund's investments), trade barriers, currency exchange controls, and national and international political, environmental and socioeconomic circumstances (including Russia's invasion of Ukraine and other conflicts, geopolitical tensions, terrorist acts or security operations and actual or threatened epidemics or pandemics). Instability in the securities markets will also likely increase the risks inherent in the Fund's investments. There can be no assurance that such economic and market conditions will be favorable in respect of both the investment and disposition activities of the Fund.

**Recourse to Assets of the Fund.** The assets of a Sub-Fund, including its investments and any capital held thereunder, may be available to satisfy all liabilities and other obligations of the relevant Sub-Fund. If the Fund becomes subject to a liability, parties seeking to have the liability satisfied may have recourse to the Fund's assets generally and not limited to any particular asset. Accordingly, a Shareholder in a Sub-Fund may find its interest adversely affected by a liability of the Fund, even if such liability was not directly incurred in relation to such Sub-Fund.

**Valuation.** There is no established market for private equity partnership interests or for the privately-held portfolio companies of private equity sponsors, and there may not be any comparable companies for which public market valuations exist. As a result, the valuation of Fund investments will be difficult, may be based on imperfect information and is subject to inherent uncertainties, and the resulting values may differ from values that would have been determined had a ready market existed for such investments, from values placed on such investments by other investors and from prices at which such investments may ultimately be realized. Furthermore, no assurances can be given regarding the valuation methodology or the sufficiency of systems utilized by the Fund, the accuracy of the valuations provided by Fund investments, that the investments will comply with their own internal policies or procedures for keeping records or making valuations, or that an investment's policies and procedures and systems will not change without notice to the Fund. The uncertainty of valuations could limit the ability of shareholders to gauge the Fund's ongoing performance. Additionally, Alpinvest may face a conflict of interest in valuing the Fund's investments, as the net asset value of the Fund will affect Alpinvest's compensation.
